Multi function exercise tubes, which can offer multi resistance combinations. This can be used in different occasions as resistance tube, expander and door attachment. This is easy carry and adjustment resistance tube.

PATENTED

LT-1501:
adjusted design that with 4 fixable points.
Adjustable length from max.
150cm to min.30cm.
By adjusting the length and resistance
to fit user's demand. This also can be
used as expander and resistance tube.

316TR-3:
adjustable tubes that
supplying multi resistance functions
by changing the resistance tubes.

Rubber band is extremely wide used on warming up before exercise or body training. And it can be used for a variety of strength, speed, flexibility and rehabilitation exercises. The resistance can be adjusted by making a tie or folding it for the purpose of suitable training levels. Rubber bands are extremely effective for both upper and lower body training, also body flexibility.

ゴムバンド

多様なストレッチができます。バンドを結ぶことによりストレッチの種類が増えます。

Exercise band is one of the most common used applications in rehabilitation and training. It is light weighted and very cost effective tool.

The bands can be used in one long piece, but also as a tube by connecting both ends together. The bands are easy to use and can be taken anywhere since they are light weighted and easy storage. The exercise band doesn't consist of LATEX for people with latex sensitivity. Cut a piece of the band into the desired length and you can start training.

This adjustable hand grip is also equipped with a counter to keep track of the amount of exercise.

The knob can be turned upward to increase resistance or downward to decrease the resistance.

回転ノブを回すと、グリップ強度の強さを細かく調整できます。上にまわすと、強度が強くなり、逆に下に回すと、弱くなります。

DES.C. SIT UP CUSHION

- 1 PC/COLOR BOX (30 x 34 x 9 CM)
- 6 PCS/CTN/32 x 36 x 56 CM/2.3'
- N.W.:9 KGS G.W.:10 KGS

Arch design naturally curves to the back, allowing for more effective core work while protecting your lower back. Great for those with lower back pain problems who want a safe way to continue strengthening their abdominal muscles. The height can be adjusted by inflating the air into the cushion, durable material gives comfort and the perfect amount of firm support for your back and spine. Available for seat cushion purpose.

This is the air-filled tool for self-massage and relaxation. The roller can be adjusted easily by using the hand pump to different hardness. The air-filling causes an absorbing effect. Therefore it is also allowed and recommended to roll and move even on joints and vertebral bodies. The structured surface enables to a more effective and deeply working massage. The surface enables a more effective and pleasant massage effect. Due to a massage on the roll under use of your own body weight adhesions and tensions can be solved. Therefore your blood circulation can be improved. The Massage roller is used in fitness, training, rehabilitation or in therapy.

- 20 PCS/CTN/34 x 38 x 53 CM/2.4'
- N.W.: 16 KGS G.W.:17 KGS

Single leg squat

Stand leaning backwards slightly with your face against your Multi Gym Trainer and hold on gently to the handles. Raise one leg and find the right body position with your weight in the centre of your foot. Move down into a squat-like position by bending your leg. Do not raise the heel of the leg you are standing on. Move back up into a standing position. Use your arms as little as possible.

Back row

Stand leaning backwards with your body straight, hold onto the handles with your arms straight in the direction of the straps. Pull up your upper body between the handles, with your elbows close to your body. Relax your arms and shoulders forwards into the starting position.

Tricep press

Stand in the basic position, with your arms straight at shoulder height in front of your body. Keeping your body straight, pull forwards by bending your arms until the handles are at the same level as your ears. Push your arms straight and return to your starting position.

Chest press

Stand leaning forwards slightly in the basic position, with a handle in each hand. Drop forwards between the handles, with your upper arms slightly away from your body, and push up until your arms are straight. Keep your body straight throughout the entire exercise.

Hip abduction

Lie on your back, with your heels in the foot loops. Keep your shoulders and arms on the floor. Move your legs out to the sides in a V shape. Return to your starting position.

Oblique leg raise

Lie on your back and hold onto both loops with your hands. Hold your legs straight up. Twist your legs to the side as far as you can. Return to your starting position. Then twist your legs in the other direction. Vary the sides.

The sling trainer is functional exercises for the whole body, whether indoors or outdoors. The straps with length indicator which you can adjust the length of the rope according your requirement. It is perfect and highly effective training device for all your body's muscles.

A power twister is a piece of fitness equipment that consists of a bar with handles on both ends and a resistance spring in the center. An individual can work the upper body, including the chest, shoulders, and arm muscles, by applying force to the handles and bending the bar. It is easy to carry and can do anywhere.

CABLE SPEED!

It is comfortable with foam covered and designed with swivel ball bearing handle.
Weight is evenly distributed throughout rope.
Swivel ball bearing handles make the rope spin faster, and reduce stress on shoulders, elbows, and wrists.
Improve speed, strength, coordination and explosiveness.
